

Release: KK PI 26.4.9

Release ID: #318015 **Prepared by:** [VERIFY — dev lead name] **Date:** 2026-04-09 **Branch:** release/318015_KK_PI_26.4.9

1. Summary

- **eForms:** Cleanup orphaned enrollment reports on Send Invitations screen (#316482); fix cancel-invitation not removing reporting records (#317375); fix FRP Basis sort order on Approve & Renew (#298280).
 - **Tiering (CACFP):** Fix Child Income Eligibility (Tier 1) incorrectly auto-set for all children in Tier 1 homes — now only applies to provider's own children by income (#318945); includes data migration script and cross-repo changes (KK, HxCloud, Database).
 - **Claims:** Fix List Claims default filter showing only unsubmitted claims instead of all (#319629); fix Adjust Claim Count validation blocking save after removing approved meals (#293930).
 - **Attendance:** Fix Certificate pop-up unresponsive when both Certify Accuracy and Auto-Calc Qty settings enabled (#317820, #319627) — covers both classrooms-attendance and classrooms-daily-attendance screens.
 - **Printing/Checks:** Fix check printing at ~70% scale, alignment issues, itemized detail showing wrong amount/label for consolidated checks (#318211, #320038); remove memo line from bottom section.
 - **Reports:** Fix Child List missing in Review Worksheet from Observer Mode (#317938); fix MPR milk quantity not calculating for Open Enrolled (ARAS/SFSP) centers (#317867); fix print MPR incorrect from sponsor view.
 - **Enrollment/Children:** Fix expired/expiring-soon filter 1-day gap on exact expiration date (#319633); fix ChildSendInvitations API NullReferenceException (#314517); fix food audit fields saved as NULL or -1 (#307083).
 - **Centers Policy:** New Policy D.33 — Use Historic Claims Data for Rosters with 6 sub-policies (D.33a–D.33f) for enrollment date, IEF expiration, FRP designation/basis, and classroom (#318497).
 - **Parachute Integration:** Address sync (City, State, Zip) between Parachute and KidKare for all account types (#317756); remove Accounting PIN from KidKare pages (#319102); enhance child classroom assignment to prevent duplicates (#318618).
 - **Guardian Management:** Filter out inactive contacts (status 289) from Manage Guardians tab (#316483).
 - **TX Compliance:** Update Texas IEF for Child Care Center from July 2022 to March 2026 version — English and Spanish (#319410).
 - **Reverted:** #311567 (Eform signature date) — withdrawn, issue confirmed resolved in current state. #317708 (Provider Training validation) — reverted.
-

2. Infrastructure Impact

Overall Risk Level: High

2.1 Database Changes

- **MinuteMenu.Database:** 318945_Fix_child_income_eligibility_tier1.sql — Data migration: backup child tier data, clear tier for Census/School provider children, clear tier for non-own Income

children, sync dates for own Income children. Audit trail: `mod_login_id = '-318945'`.

- MinuteMenu.Database: `317375_cleanup_orphaned_reports_after_cancel_invitation.sql` — One-time cleanup of orphaned `KK_EnrollmentReport` records left behind by prior cancel-invitation operations. Scoped to CX and HX, Submitted by Parent only. TRY/CATCH with rollback.
- MinuteMenu.Database: `311567_revert.sql` — Revert of signature date changes from #311567.
- MinuteMenu.Database: `select_child_by_provider_id_filter_for_UP332_sp.sql` — Fixed Tier display at 4 locations: Tier 1 provider → ALL children display Tier='1' regardless of child's tier_code. Fixed bug comparing tier vs itself.
- MinuteMenu.Database: `select_rpt_422_*.sql` (Child Roster SPs) — Extended ClaimChildKeyData JOIN for D.33 policy; added per-field CASE logic for D.33a–D.33f sub-policies; fixed residual @mode IN (2,3) block and incorrect D.33 override ordering.
- MinuteMenu.Database: `SelectRptClaimsRosterSponsor.sql` — Added ClaimChildKeyData JOIN for D.33; replaced flat D.22 overlay with per-field CASE expressions.
- MinuteMenu.Database: `insert_default_independent_policies.sql` — Added D.33 and D.33a–D.33f policy defaults (all N).
- MinuteMenu.Database: `get_MilkQuantity_NonInfant_ForNeeded` — Added Open Enrolled (ARAS/SFSP) center support for milk quantity calculation using `SFSP_ATTENDANCE_ITEM`.
- MinuteMenu.Database: `MRP.build.config / MRP.sql` — Build config and release script updated.

2.2 Auth / Session Changes

- None
- Expected re-authentication impact: None — no auth changes

2.3 API Changes

- CHANGED: `POST enrollment/sponsor/ChildSendInvitations` — Fixed `NullReferenceException` by replacing `_userSessionState` (constructor injection) with `UserSessionState` (property injection); added null guards for `GuardianId` parsing (#314517).
- CHANGED: `PUT UpdateCenterSite` — Now also persists `city_name`, `state_code`, `zip_code` when updating center site (#317756).
- CHANGED: `GET GetMySite` — Response now includes `City`, `StateCode`, `Zip` fields (#317756).
- CHANGED: `GET GetSponsorReviewWorksheetReport` — Now uses sponsor's `current_claim_month/year` instead of `DateTime.UtcNow`; passes `@IncludePending` and `@IncludeExpired` to SP (#317938).
- CHANGED: `GET GetRecurringInvoiceProviders` — Now accepts `sponsorId` parameter for optimized provider lookup.
- NEW: `POST process-enrollment-report-cleanup` — Batch cleanup endpoint for stale enrollment reports; uses keyset pagination, batched writes of 50, `ReadUncommitted` isolation for reads (#316482).
- DISABLED: `SyncClassroomToParachute` call in `AddCxChild` is commented out — classroom sync to Parachute disabled for CX child creation (#318618).

2.4 Performance & Capacity

- Enrollment report cleanup API scanned 1,916,246 completed enrollment reports and cleaned up 100 orphaned record sets on QA. **Monitor** — watch execution time and DB load when run on production (one-time operation).

- D.33 roster SPs add ClaimChildKeyData JOINS to Child Roster and Claims Roster stored procedures. **Monitor** — watch SP execution time after deploy, especially for large sponsors with many claims.
- Tier data migration script (#318945) updates CHILD table records across all sponsors. **Monitor** — watch for lock contention during execution on production.
- `select_child_by_provider_id_filter_for_UP332_sp` changed at 4 locations. **Monitor** — verify child list performance for Tier 1 providers.

2.5 Cross-Repo Dependencies

- Repos involved: KK, POC_HxCloudConnectApi, Centers-CX, MinuteMenu.Database
- Deploy order: MinuteMenu.Database → POC_HxCloudConnectApi → KK → Centers-CX [VERIFY — confirm deploy order with DevOps]
- Rollback order: Centers-CX → KK → POC_HxCloudConnectApi → MinuteMenu.Database [VERIFY]

3. Web Configuration Changes

Service	Key	Value	Notes
KK BE	<code>Settings.ReviewToolPendingChildren</code>	existing setting	Now read by Observer Mode review worksheet endpoint — must be present in config [VERIFY]
KK BE	<code>Settings.ReviewToolActiveChildrenWithExpiredEnrollment</code>	existing setting	Same — now read by Observer Mode endpoint [VERIFY]

4. Rollback Plan

1. Deploy previous Centers-CX build via Octopus [VERIFY — build number]
2. Deploy previous KK BE + FE builds via Octopus [VERIFY — build numbers]
3. Deploy previous POC_HxCloudConnectApi build via Octopus [VERIFY — build number]
4. Run rollback SQL scripts for data migrations: reverse 318945 tier fix using backup table, reverse 317375 cleanup [VERIFY — confirm rollback scripts exist]
5. D.33 policy data: no rollback needed — new policies default to N and have no effect unless explicitly enabled by sponsors

5. Risk Assessment

- **Worst case:** Tier data migration (#318945) incorrectly updates child tier_code values, causing children to be claimed at wrong tier rates. D.33 roster SPs return incorrect data for sponsors who enable the new policy immediately after deploy.
- **How we detect it:** Sponsor reports of incorrect tier display or claims data; Application Insights exceptions on ChildSendInvitations or enrollment cleanup APIs; QA spot-check of tier data for known test sponsors

(996, 117, 166, 227, 245).

- **How we recover:** Rollback per Section 4; tier data can be restored from backup table created by migration script (`mod_login_id = '-318945'`). D.33 policies can be disabled (set to N) per-sponsor without code rollback.

6. Deployment Checklist

#	Step	Owner	Status
1	Dev lead prepared release note	[VERIFY]	Pending
2	DevOps reviewed infrastructure impact	[VERIFY]	Pending
3	Architect reviewed changes	[VERIFY]	Pending
4	SQL scripts verified on staging	[VERIFY]	Pending
5	Web config changes documented and ready	N/A	Done
6	Rollback plan confirmed	[VERIFY]	Pending
7	Production deployment approved	[VERIFY]	Pending

7. Tickets

Ticket	Title	Type	State	Infra Impact
#318497	Centers: New Policy D.33 – Use Historic Claims Data for Rosters	Story	Released	High
#318945	Fix: Child Income Eligibility (Tier 1) incorrectly auto-set for all children in Tier 1 homes	Story	Released	High
#316482	KCE: Some Expired IEFs and EFs Are Missing From The Send Invitations Screen	Story	Released	Medium
#317375	Submitted (parent) eforms are not showing up for approval	Story	Released	Medium
#318211	Printing check issues - HX023	Story	Released	Low
#320038	The check report is not the same as the HX app	Bug	Released	Low
#319629	List Claims default filter shows only unsubmitted	Story	Released	Low
#317820	Unable to close Certificate pop-up with Auto Save Actual Qty	Story	Released	Low
#319627	Cert modal buttons unresponsive on Daily Attendance screen	Bug	Released	Low
#314517	Error: Exception when calling API enrollment/sponsor/ChildSendInvitations	Story	Released	Medium
#307083	Should log correct mod_login_id and mod_date_time when creating/updating foods	Story	Released	Low
#298280	Sort Issue in eForms - Approve & Renew	Story	Released	Low
#317867	OK - CX8288 - Actual Quantity Required Not Calculating	Story	Released	Medium
#293930	Adjust Claim Count validation for approved meals	Story	Released	Low
#317938	Child List is missing in Review Worksheet from Observer Mode	Story	Released	Low
#319633	Application Insight Review - Expired/Expiring Soon filters 1-day gap	Story	UAT	None
#316483	Food Program needs to handle p_participant records with record_status_code = 289	Story	Released	Low
#319410	Texas - Update IEF for Child Care Center	Story	Released	None
#319477	Tier 1 Start/End Date incorrect when enrolling new Own child	Bug	UAT	None
#319102	Remove Accounting PIN from KidKare pages	Story	Released	None
#317756	Address Sync Between Parachute & Kidkare	Story	Released	Low
#318618	Enhance assign child classroom in Parachute	Story	Released	Low
#311567	Eform approved and renewed but signature date not updated	Story	Withdrawn	None
